2026 EV Driver Annual Survey

Nationwide survey of over 3,800 electric vehicle drivers

After acquiring an EV, respondents experienced fewer concerns about battery range, price, and public charging availability.

KEY EV DRIVER STATISTICS

94%

Of EV drivers expect their next car to be electric

75%

Of households with an EV and a gas car drive the EV more

31%

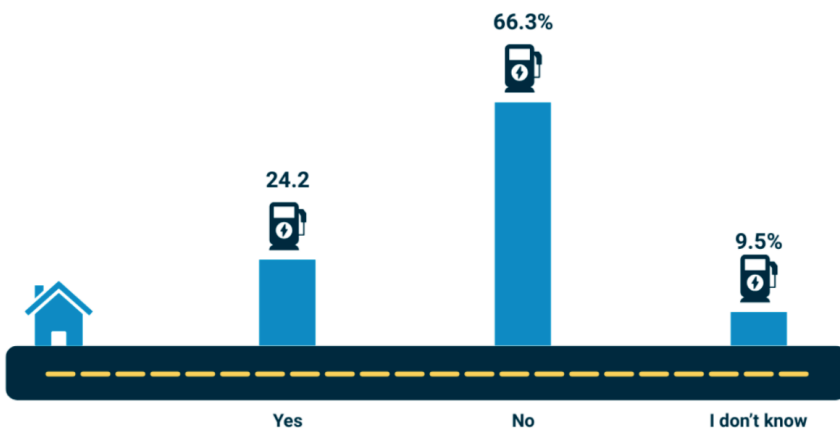

Of EV drivers charge daily. Even with home charging, batteries store enough power that most drivers charge a few days a week.

10%

Decrease in EV drivers who experienced broken chargers this year

Do you have a public Level 2 charger within walking distance of your home (not counting any home charging you may have)?

EV drivers *agree* with the following statements:

"I save money by driving an EV." 91%

"My EV is reliable." 94.6%

"My EV is convenient." 95%

"I feel safe driving my EV." 96.8%
